

IHCI Project Proposal

Rules

- Submit a Google Doc, NOT a PDF or a Google slide.
- Use the default fonts, line spacing, and font size unless specifically required in the assignment.
- After submission, the Google Doc will get automatically locked, so you won't be able to make any changes.
- Standard plagiarism rules apply.
- Your submission will not be considered for grading and feedback if you do not follow these guidelines.

Project Group Number: B_G15_P1

HCI Group No.: 15

Problem Statement

Introduction to the problem - A lot of people face hurdles when it comes to the domain of sports. The lack of awareness about the different sports, their rules, professional aspects and their prerequisites, lack of information about events and tournaments, etc makes it gruesome for them to develop or pursue their interests in it.

Background and Context -

Current state : People don't value sports as a profession due to the financial struggle that athletes face, there is no general awareness among people on how a particular sport operates, they don't relate to how an athlete is evaluated or what conventional rules are followed during a match.

Key statistics -

1) India has won only 41 medals in 25 summer Olympics since 1900 and never won a winter Olympics medal. India performed its best in 2020 Tokyo grabbing a total of 7 medals only.

2) Only 5.56% of India's population is sports literate according to the Institute of management technology.

3) Only 57 lakhs people of this country are directly related to sports.

4) Sports contribute to only 0.1% of India's GDP.

User pain points -

1) A lot of sports are not accessible to a big chunk of the country.

2) If someone wants to pursue a career in sport, he has to face societal and financial pressure. He is considered unemployed until he succeeds.

3) Talented youth are quite burdened to quit sports and get a job.

4) Many athletes don't get the recognition they deserve.

Target Audience - Our interface will be useful for anyone who wants to cultivate their interest in any sport of their choice. It is for every person who is new to sports and desires to know about their favorite sport. It is also for people who already know about it, no matter how seasoned they are.

Core Objective - Our core objective is to promote sport literacy and spread awareness about various sports and thereby culminating genuine interest in every individual about the intriguing world of sports. Our focus is on increasing the general participation of people in sports and in building an audience that celebrates sports.

Background of the Problem and Motivation

Importance - Betterment of the current scenario will enhance the quality of sports, which will help in gaining an audience, consequently more investors and funding to sports. The national image of our country in sports will improve significantly. Individual talented people will face less barriers to pursue their career in sports. It will enhance the overall physical and mental well being of such a huge population.

Inspiration - The recent performance of India in the Paris Olympics where we won only 6 medals including no gold and ranked 71 out of 84 countries which won at least one medal. There are no significant platforms to increase people's awareness about sports.

Impact - We expect to bring a change in the ideology of people about the sports industry, teach them about how a sport operates and brief them about the rules and regulations of sports. It will enhance their participation in sports and increase the demand of every sport and one day we will lead in each and every one like we currently lead the world in cricket.

Scope

Solution coverage - Through our technology and Design driven interface, we will address the issues of low sports literacy, lower audience of different sports, a lack of general awareness among people about sports, the athletes not getting the recognition they deserve, and the difficulty in getting updates about different sports. We will create different sections and sub sections for addressing different problems which will improve the user navigation to the required portion and also improve the overall user experience and user engagement of the platform.

Core functionalities -

- 1) Rules and regulations briefing of different sports and knowledge of the required equipment.
- 2) Daily news and updates about sports.
- 3) Different sections for the best athletes to provide them the recognition they deserve.
- 4) Career paths and processes required in a simplified and dignified manner.
- 5) Updates about the latest events and tournaments.

User experience - we will be focused on delivering a user friendly interface through Figma, Canva, Miro etc. We are also bound to follow the design principles to the maximum within our limits.

Constraints -

- 1) The project will not cover advanced illustrations and visual animations due to time, budget and technical constraints.
- 2) Registration and booking of different workshops and tournaments will also not be covered in this project due to networking and budget constraints.

Contributions

Mrityunjai Poddar - Background, Key statistics, User pain points, Points Research, Topic Research

Paarth Agarwal - Solution Coverage, Core Functionalities, Points research, Editing and organization

Mayank Rajput - Target Audience, Core Objectives, points research

Preyash Prakash - Introduction, Importance, points research

Navrun Singh - Impact, Inspiration, points research

Prajeet Kumar - User Experience, Constraints, points research, idea proposal

Opinions and reviews were taken at every step from every member of the team.
